

Raul Celorio

Building beautiful solutions that just work.

Thanks for stopping by.

I am a solutions-oriented IT Professional with 10+ years of diversified experience in all phases of project life-cycle planning and implementation. Strong leadership, analytical, troubleshooting, crisis management and communications skills. Highly skilled in solving complex business intelligence, infrastructure, and IT operations challenges.

More about Me

I am a developer base out of Oakland, CA with a passion for solving complex problems. I believe data = EBITDA. Contact me and I will show you why.

Technologies I use:

MS SQL Server, MS Access, MySQL, Postgres, Visual Basic, WMI, VBS, Python, Regular Expressions, MS Office, MS Visio, SSRS/SSAS/SSIS, PowerBI and PowerApps

Recent Projects

These are just a few of the projects I have collaborated on.

Mission to Mars!

Build a webscraping application to consolidate the latest information and images from the Mars exploration effort.

Surf's Up!

Gather data on the seasons of Oahu and determine whether the seasons could affect the surf and ice cream shop business. Specifically, are there certain times of the year when business might be slower, or the type of customer could be different?

Let's go to the Movies!

The worlds largest streaming video service would like to develop an algorithm to determine which low buidget movie will become popular. Our mission, produce an ETL pipeline to prepare a dataset for developers to perform analysis.

Education

Saint Louis University

B.A., Psychology & Statistics | 2000

University of Phoenix

M.A., Computer Information Systems | 2004

UC Berkeley Extension

Certificate, Data Analysis | 2020

I'm available for work.

Actively contributing to new projects and seeking a contract role in a fast-paced, agile environment. Get in touch!
